

# KRE-ALKALYN®

**"pH Correct" Creatine Monohydrate**

**Kre-Alkalyln's® patented pH-Correct™ buffering technology turns the tables on creatinine...**

**It DOESN'T convert in liquids! We call it pH-Correct™ technology. You'll call it the best way to avoid side effects, loading or cycling, save money and get the results you want from creatine.**

**The research behind Kre-Alkalyln's® patent clearly shows that creatine's speed of conversion to creatinine is directly related to the pH of the liquid used for mixing—the lower the pH, the faster it converts. It was also discovered that conversion rates slow dramatically as the pH of the creatine itself is raised above 7, and stops completely above pH 12.**

**Don't settle for unstable creatine that converts to creatinine before reaching muscle! Kre-Alkalyln® gives you the results you crave from creatine... WITHOUT puffy bloating, painful cramps or the hassles of loading and cycling all thanks to pH-Correct™ technology!**

**Flavours:**  
**Natural**

**Available In:**  
**150g Tamper Evident Container (50 Serves)**

Kre-Alkalyln® is a registered trademark of All American Pharmaceutical and Natural Foods Corporation (AAP). Kre-Alkalyln® is a multi-patented product (US Patent #6,399,661, Australian Patent number #AU2003203344 NZ Patent number #519305) International patents pending. All rights reserved.

**Puffy Bloating...GONE!**  
**Muscle and Intestinal Cramping...GONE!**  
**Loading Phase...GONE!**  
**Cycling On and Off...GONE!**  
**Poor Results...GONE!**

**Kre-Alkalyln®** is the only creatine product in the world with a pH above 12 because its molecules are synthesized with "buffering" agents using a patented manufacturing process. As a result, it remains completely stable and reaches muscle cells at full strength.

**Kre-Alkalyln's®** Patent also covers all pH levels from 7-14. Therefore, the pH of all other creatine products must be pH 6.9 or less — meaning they will convert to creatinine in liquids.

**What else makes Kre-Alkalyln® different?**

**All the benefits of creatine without the side-effects:**

Doesn't convert to creatinine so you won't have any side-effects.

**Get immediate results:** Works from the very first serving – no loading necessary.

**Save money:** Experience results using as little as 1-3 g per day.

The ultimate metabolic acid buffer: neutralises lactic acid so you can perform at even higher levels.

**The ultimate metabolic acid buffer:** Neutralises lactic acid so you can perform at even higher levels. Don't settle for unstable creatine that converts to creatinine before reaching muscle! Kre-Alkalyln® gives you the results you crave from creatine... WITHOUT puffy bloating, painful cramps or the hassles of loading and cycling all thanks to pH-Correct™ technology!

**INGREDIENTS: Pure Creatine Monohydrate**
